

MUGYUM KIM

Daejeon, Republic of Korea | mugyumk@gmail.com

kmmugyum.github.io/portfolio · github.com/kmmugyum · linkedin.com/in/mugyum-kim

AI/ML undergraduate researcher with experience in computer vision, anomaly detection, dataset curation, and deep learning model training.

Education

B.Eng. in Artificial Intelligence

Chungnam National University, Daejeon, Republic of Korea

Mar. 2022 – Feb. 2028

Major GPA: 4.41/4.5 | Cumulative GPA: 4.23/4.5

Skills

- **Languages:** Python, C/C++
- **Frameworks:** PyTorch, TensorFlow, LoRA/PEFT
- **Core Libraries:** NumPy, Pandas, scikit-learn, OpenCV, Albumentations
- **Training & Experimentation:** Weights & Biases

Experience

Undergraduate Research Intern

ETRI (Electronics and Telecommunications Research Institute), Daejeon, Republic of Korea

Mar. 2026 – Jun. 2026

- Formulated a real-time network anomaly detection task using packet metadata only, designing a lightweight NIDS pipeline without payload inspection.
- Trained and evaluated multi-label detection models for scanning, C2 beacon, and malware delivery traffic, achieving 94.8% macro-F1 on the held-out test set.
- Built a preprocessing pipeline to extract flow-level features from PCAP files using tshark, enabling reproducible dataset construction for training and evaluation.

Undergraduate Research Intern

DIPLAB, Chungnam National University, Daejeon, Republic of Korea

May 2023 – Feb. 2024

- Curated and labeled an 81,000+ sample satellite imagery dataset from an industry partner for cropland and greenhouse segmentation.
- Implemented and trained a SegFormer-based segmentation model, achieving 88.9% mIoU on a three-class cropland classification task.
- Built and labeled a vehicle pose estimation dataset from real-world CCTV footage across multiple environments, supporting a drunk-driving analysis pipeline.

Awards & Scholarships

Academic Excellence Scholarship, Chungnam National University (2022/2, 2023/1, 2023/2); SW-Centered University Activity Scholarship (2023/2)

Extracurricular Activities

Treasurer, DIVE (AI Club), Chungnam National University, 2023

- Organized a 2023 corn seed classification competition.
